

Computer Numerical Control (CNC) Pre-Apprenticeship

Looking for a career in a growing industry? *Take a closer look at becoming a*

CNC Machinist

If you are a Californian resident with high functioning autism interested in establishing a career in the fast-growing Computer Numerical Control (CNC) industry, Ready, Willing and Able can help you achieve your goals!

The Ready, Willing and Able initiative, in partnership with the NTMA Machinist Career College is currently recruiting for a select-entry CNC Machining pre-apprenticeship program.

CNC Machinists use machine tools, such as lathes, mills, routers, grinders and laser cutters to produce precision manufactured products. CNC Machinists and programmers are employed widely across all manufacturing sectors, including aerospace, automotive, defence and medical products.

NTMA foster an inclusive, student-oriented, campus that includes:

- A small class size of 12-15 students.
- A 7-month Program that offers morning, afternoon, and evening classes
- Student Services support team
- All learning materials
- Employer campus-site hire day
- Ongoing support after graduation, including job placement assistance, where applicable
- Federal Financial Aid and State-Funded Work Source Funds to cover tuition costs for eligible students

Pre-requisites:

- This program has no prerequisites, making it accessible to anyone who wants to pursue a career in our field
- Enthusiasm for a career as a Computer Numerical Control (CNC) Machinist

Note: NTMA works with employers who are felon-friendly, so your past does not determine your future.

Did you know that upon qualification CNC Machinists enjoy an average starting salary of \$52,322?*

CNC Machinist

What You Need to Know

CNC Machinists set up, operate, or tend to more than one type of cutting or forming machine tool or robot. They ensure equipment and systems run smoothly and perform to the specifications of the task at hand. CNC Machinists must have an eye for detail and strong working knowledge of their machines' capabilities.

On the job, you will:

Inspect workpieces for defects, and measure workpieces to determine the accuracy of machine operation, using rules, templates, or other measuring instruments. Position, adjust, and secure stock material or workpieces against stops, on arbors, or in chucks, fixtures, or automatic feeding mechanisms, manually or using hoists.

What Do You Need To Succeed In This Role?

Key Attributes

This job will suit individuals who possess:

- Attention to Detail
- Persistence
- Dependability
- Adaptability/Flexibility
- Integrity
- Stress Tolerance

Abilities

Hand and Finger Use

- keep your arm or hand steady
- hold or move items with your hands

Controlled Movement

- quickly change the controls of a machine, car, truck or boat
- use your arms and/or legs together while sitting, standing, or lying down

Ideas and Logic

- notice when problems happen
- order or arrange things

Attention

- pay attention to something without being distracted

Skills

Basic Skills

- keeping track of how well people and/or groups are doing in order to make improvements
- listening to others, not interrupting, and asking good questions

Problem-Solving

- noticing a problem and figuring out the best way to solve it
